Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 3634

In summary:

Claims 15-22 have been cancelled; and

Claims 1-14 are herein addressed below.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gillery (4,235,048) in view of Finley (2002/0045073 A1). Gillery ('048) discloses a reversible window unit having reflective layers on an insulated glass mounted within a pivoting frame, which is mounted within a framed opening. Gillery ('048) fails to disclose a photocatalytic layer of titanium. Finley (2002/0045073 A1) discloses a photocatalytic layer of metal oxide titanium formed on a glass pane substrate. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the reversible window assembly of Gillery ('048) with a photocatalytic layer of titanium as taught by Finley (2002/0045073 A1) since a self-cleaning layer allows the window assembly to be easily cleaned by itself. It would have been further obvious to one of ordinary skill in the art at the time of the invention to provide layers on both the exterior and interior face of a window assembly since a reversible window would allow both surfaces to be positioned on the outside and a mere duplication of parts to provide

Art Unit: 3634

layers on both sides of a window assembly would be an obvious design choice to one of ordinary skill in the art.

The applicant's arguments have been considered but are not deemed persuasive. It appears that the applicant's arguments are more limiting than that of the claims. The applicant argues how the window moves and/or the function of the window of the prior art but fails to positively limit the claims to overcome this distinction. Furthermore, the applicant argues the references individually and not the combination thereof. Still furthermore, the applicant argues limitations to the claims, which have just been added/amended within the claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
